

8355

Premium Series 1/2 HP AC Belt Drive Garage Door Opener

Smart, Safe and Quiet

LiftMaster® Introduces the New 8355 Belt Drive Garage Door Opener with MyQ® technology

Smart Control. MyQ® technology allows you to open, close and monitor your garage door and house lights via smartphone, tablet or computer from anywhere, any time. (LiftMaster® Internet Gateway required; sold separately.)

Security with Every Click. Security+ 2.0™ rolling code technology keeps you safe ensuring a new code is sent to the garage door opener every time the remote control is used, making it virtually impossible for someone to intercept your code.

Quiet Operation. The belt drive and Motor Vibration Isolation systems offer the ultimate in quiet and smooth operation. Ideal for homes with a living space above or next to the garage.

Energy-Efficient. Operation consumes up to 75% less power in standby mode.

We've taken your home security and safety a step further.

Electronic Security. PosiLock® system electronically secures a closed garage door and monitors against a forced opening. If a forced opening is detected, it automatically reactivates the opener to the closed position.

Safety Sensors. Protector System® safety sensors keep you and your family safe by projecting an invisible light beam across the garage door opening; automatically reversing the door if anything interrupts the beam.

Warning System. Alert-2-Close provides UL-compliant audible and visual warnings that the garage door is about to close when using MyQ® technology.

Warranty

Lifetime motor and belt warranty plus 1-year parts warranty

To reduce the risk of injury to persons – When the LiftMaster Internet Gateway is used with garage door openers, the operator must be installed with sectional doors.

3280

1/2 HP Belt Drive Garage Door Opener

Overall Rating:

Quiet and smooth, yet as tough as a steel-belted tire, the 3280 1/2 HP Belt Drive Garage Door Opener is the perfect choice if you want both quiet and smooth-running reliability, or simply have rooms positioned above your garage. The 1/2 HP heavy-duty motor is equipped with our patented Motor Vibration Isolation System (MVIS®) that eliminates powerhead vibration for reduced noise. It also features a solid-steel T-rail with automatic belt tensioner on the trolley, and an enhanced belt drive system for a more secure belt grip.

This model has earned the *Good Housekeeping* seal.

- **The Smart Garage Door Opener®** lets you electronically program security codes from the Multi-Function Control Panel or the powerhead
- **Delivers 200 watts of light** with adjustable light time delay
- **Meets all UL325 requirements**

SAFETY & SECURITY FEATURES

- **The Protector System®** safety sensors project an invisible light beam across the garage door opening and automatically reverse the door if anything interrupts the beam while the door is going down
- Sensing technology will **stop the door from closing if contact is made** with a person or object
- Opener lights turn on automatically when The Protector System's infrared beam is broken
- **Security+® rolling code technology** assures a new code is sent every time the remote control is used
- **Patented PosiLock®** system ensures the door remains securely locked when the garage door is closed
- **Manual release handle** in case of power failure

WARRANTY

- Lifetime motor and belt warranty
- 1-year parts warranty
